Data Section 1

Major Developments after
April 1, 2008

(After FY 2008)

Date	Developments	Contents
2008. 3. 1 to 7.10	Establishment of a period for stepped-up landing examination, and for special stepped-up landing examination in connection with the holding of Hokkaido Toyako Summit, etc.	In connection with the holding of the Hokkaido Toyako Summit and the G8 Ministerial Conference, etc., the period from March 1 to June 6 was designated as the period for stepped-up landing examination for blocking the entry of terrorists, etc. by ready immigration procedures and strict examination for leaders of various countries, etc. Further, the Ministry responded by opening the "Operation Room for Hokkaido Toyako Summit Headquarters" within the Ministry proper from June 7 to July 10, and by designating said period as the month for special stepped-up landing examination.
2008. 4. 1	New appointment of security control officer, and establishment of planning and management department, detention department, and deportation department at Nagoya Regional Immigration Bureau	A security control officer was newly appointed, the planning and management, detention and deportation department was abolished, and the planning and management department, detention department and deportation department were newly established at Nagoya Regional Immigration Bureau.
2008. 4.30 to 2009. 3.13	Implementation of pre-clearance (advance confirmation) in China (Taiwan)	Advance confirmation for immigration examination was implemented at Chiang Kai-Shek International Airport in China (Taiwan).
2008. 4.30 to 2009. 3.21	Implementation of pre-clearance (advance confirmation) in Korea	Advance confirmation for immigration examination was implemented at Incheon International Airport in Korea.
5. 2	Promulgation of the "Act for Partial Amendment of the Act for Preventing Communicable Diseases and for Medical Treatment for Patients of Communicable Diseases and the Quarantine Act" (Act No. 30 of 2008) (Enforcement on May 12, 2008)	As cases where human beings are affected by H5N1 type bird flu were increasing and a new type of pandemic was feared worldwide, the Immigration Control Act was amended to add patients with the new type of flu into reasons for denial of landing.
5.23	Holding of the "Council on Countermeasures against Illegal Foreign Workers"	The "Council on Countermeasures against Illegal Foreign Workers" was held to discuss the present situation of measures against illegal foreign workers and future measures with the participation of the directors of the National Police Agency, the Ministry of Justice and the Ministry of Health, Labour and Welfare.
5. 26	Public announcement of "Guidelines on the treatment of Indonesian nurses, etc. subject to the provisions of the agreement between Japan and the Republic of Indonesia in economic partnership in relation to the Immigration Control Act"	As the result of the coming into force of the Economic Partnership Agreement between Japan and Indonesia, the guideline on the treatment of Indonesian Nurses, etc. subject to the provisions of the agreement in relation to the Immigration Control Act was formulated.
5.29 to 11.24	Liaison officers were dispatched to Thailand	Travel documents were examined, and advice to staff of airline companies was given at Bangkok International Airport in Thailand.
6. 1 to 6.30	A "Illegal Work Prevention Campaign" was implemented.	Understanding and cooperation by foreigners, employers, local autonomous bodies, foreign embassies in Japan, etc. were sought to prevent illegal employment.

Date	Developments	Contents
6. 6	The "Explanatory meeting by the Council on Countermeasures against Illegal Foreign Workers to Employers" was held.	The Council on Countermeasures against Illegal Foreign Workers consisting of the National Police Agency, the Ministry of Justice and the Ministry of Health, Labour and Welfare explained the project to the Japan Business Federation, the Japan Chamber of Commerce and Industry, the National Federation of Small Business Associations and the Central Federation of Societies of Commerce and Industry, Japan and requested them to cooperate for the prevention of illegal employment.
7. 1	Enforcement of "Ministerial Ordinance Partially Amending the Ordinance for Enforcement of the Immigration Control and Refugee Recognition Act", and "Partial Amendment of the Matter Specifying Activities listed in the right-hand column of Appended Table I (5) of said Act (only the part pertaining to d.) based on the provisions of Article 7, paragraph (1), item (ii) of the Act"	As the result of the coming into force of the Economic Partnership Agreement between Japan and Indonesia, relevant provisions relating to entry into and residence in Japan applicable to nurses, care workers and their candidates who are subject to said Agreement were defined.
9.28 to 12.28	Establishment of toll-free dial numbers: "Nationwide Hotline for Consultation Service for Foreigners" and "Nationwide Hotline for Consultation about Illegal Residence"	The Ministry proactively tried to familiarize callers with the "Departure Order System", etc. during consultation for illegal residents and inquiry about employers employing illegal residents.
10. 1	Enforcement of "Ministerial Ordinance Partially Amending the Ordinance for Enforcement of the Immigration Control and Refugee Recognition Act", and "Abolition of Provisions relating to the Authentication of Business of Examination and Certification of Facilities and Organization of Japanese Language Educational Institutions"	Relevant provisions were defined to abolish the authentication system by the Minister of Justice relating to the business of examination and certification of facilities and organization of Japanese language educational institutions for foreigners, and to make the criteria relating to the execution of said business of examination and certification objectively clear.
	Enforcement of the "Ministerial Ordinance Partially Amending the Ordinance for Enforcement of the Immigration Control and Refugee Recognition Act" and the "Order for Enforcement of the Act concerning the Processing, etc. of Services relating to Export and Import by Electronic Data Processing Systems", and the "Ministerial Ordinance to Provide for Application, etc. under Article 1, paragraph (2), item (iii) of the Act concerning the Processing, etc. of Services relating to Export and Import by Electronic Data Processing Systems"	Relevant provisions were defined to add arrival notices, bills of entry and notices of clearance of vessels to services of Nippon Automated Cargo Clearance System, Inc. newly incorporated by the Act Partially Amending the Act relating to the Special Exceptions to Customs Procedures by Electronic Data Processing Systems (Act No. 46 of 2008).
10. 8 to 10.26	Establishment of period of stepped-up landing examination	Strict landing examination was implemented by establishing a period for stepped-up landing examination at airports and seaports nationwide.

Date	Developments	Contents
10.29	The 36th "Countermeasures Conference for Prevention and Detection of Crimes of Violation against Immigration Control Act"	The 36th "Countermeasures Conference for Prevention and Detection of Crimes of Violation against the Immigration Control Act" was held with the participation of persons in charge at concerned agencies of the Ministry of Justice, the National Police Agency, the Ministry of Foreign Affairs, the Ministry of Finance, the Ministry of Health, Labour and Welfare, the Japan Coast Guard and others, and the present situation and measures for controlling crimes of illegal entry and illegal employment as well as of trafficking in persons were discussed (in Fukuoka City).
11. 6	Public announcement of "Guidelines on the treatment of Philippine nurses subject to the provisions of the agreement between Japan and the Republic of the Philippines in economic partnership in relation to the Immigration Control Act"	As the result of the coming into force of the Economic Partnership Agreement between Japan and the Philippines, the guideline on the treatment of Philippine Nurses, etc. subject to the provisions of the agreement in relation to the Immigration Control Act was formulated.
12. 1	Enforcement of "Ministerial Ordinance Partially Amending the Ordinance for Enforcement, etc. of the Immigration Control and Refugee Recognition Act"	As it was decided that public interest foundational juridical persons and public interest corporate juridical persons would be established in replacement of previous foundational juridical persons and corporate juridical persons by reform of the public interest juridical person system, relevant provisions were defined.
12.11	Enforcement of "Ministerial Ordinance Partially Amending the Ordinance for Enforcement of the Immigration Control and Refugee Recognition Act" , and "Partial Amendment of the Matter Specifying Activities listed in the right-hand column of Appended Table I (5) of said Act (only the part pertaining to d.) based on the provisions of Article 7, paragraph (1) , item (ii) of the Act"	As the result of the coming into force of the Economic Partnership Agreement between Japan and the Philippines, relevant provisions relating to entry into and residence in Japan applicable to nurses and candidates for care workers who are subject to said Agreement were defined.
12.15	Enforcement of "Ministerial Ordinance Partially Amending the Ordinance for Enforcement of the Immigration Control and Refugee Recognition Act"	The obligation to provide personally identifiable information about foreign pupils or students who would re-enter Japan as the result of overseas school excursion was exempted in the past if prescribed procedures were taken, such as a notice by the Board of Education to the Immigration Bureau. The foregoing procedure was made clear by amending the ordinance for enforcement.
12.15 to 12.16	Holding of the 22nd "Seminar on Immigration Control"	Persons in charge from 13 Pan-Pacific countries, 2 regions and 3 international organizations were invited to the "Seminar on Immigration Control" held at the Ministry of Justice to exchange information and views on issues relating to immigration control administration.
12.16	Cabinet understanding on "Concerning the Implementation of Pilot Cases relating to the Acceptance of Refugees by Resettlement to a Third Country"	A Cabinet understanding was reached on the acceptance of refugees by resettlement to a third country, whereby the Government would start acceptance as from FY 2010 as pilot cases and provide assistance for resettlement to accepted refugees.
12.18	Organization of "Discussion Meeting Report on Foreigners Register System"	The results of discussion by the "Discussion Meeting on the Foreigners Register System", the members of which consisted of influential persons and persons in charge at local public entities, and that the Ministry of Internal Affairs and Communications and the Ministry of Justice continued to hold serving as joint secretariat, were organized into a written report.

Date	Developments	Contents
2009. 1.22	Report of "Proposal on Acceptance of College Students and Pre-college Students" to the Minister of Justice	The Discussion Meeting on Immigration Control Policy, a private consultative group of the Minister of Justice, organized a written report on "Proposal on Acceptance of College Students and Pre-college Students", and submitted it to the Minister of Justice.
2. 4 to 2.22	Establishment of period of stepped-up landing examination	Strict landing examination was implemented by establishing a period for stepped-up landing examination at airports and seaports nationwide.
2.24 to 2.25	Holding of 14th "Document Examination Seminar"	Persons in charge of document examination from 19 countries and one region were invited to the "Document Examination Seminar" held at the Kansai Airport District Immigration Office of the Osaka Regional Immigration Bureau to exchange information and views on document forgery identification technology.
3. 6	Holding of "Coordination Meeting of Concerned Director Generals for Countermeasures, etc. against Illegal Foreign Workers"	The "Coordination Meeting of Concerned Director Generals for Countermeasures, etc. against Illegal Foreign Workers", was held with the participation of persons at the level of Director General of the National Police Agency, the Ministry of Justice and the Ministry of Health, Labour and Welfare to discuss present measures against illegal foreign workers and future measures.
3.11	Notification of application of requirements relating to employers of domestic servants	Notification of flexible application of requirements relating to employers specified in the announcement was given, so that persons residing under the residence status of "Investor/Business Manager" or "Legal/Accounting Services" may employ domestic servants more easily.
3.13	Notification of treatment on job-finding activities, etc. performed by foreign college students graduating from colleges, etc.	If foreign college students graduating from a college or from specialized courses of professional schools with a title of specialist perform job-finding activities after graduating from such educational institutions, and if they are recommended by such educational institutions, they are permitted to change their residence status to that of "Designated Activities", and allowed to stay for one year at the most by permitting another extension of period of stay (implemented on and after April 1, 2009).
3. -	Amendment to "Guideline on Permitting Change of Status of Residence and Extension of Period of Stay"	Based on the third report for the promotion of regulatory reform, the guideline was amended and a statement clearly made regarding enrollment in social insurance.
4. 1	New establishment of planning and management, research, detention and deportation departments at Yokohama District Immigration Office of Tokyo Regional Immigration Bureau	The security department at Yokohama District Immigration Office of Tokyo Regional Immigration Bureau was abolished, and the planning and management, research, detention and deportation departments were newly established.
4. 1	New establishment of accounting section at Nagoya Regional Immigration Bureau	The accounting section was newly established at Nagoya Regional Immigration Bureau.

“Proposal on Acceptance of College Students and Pre-college Students”

1. Concerning Proper and Smooth Acceptance of Foreign College Students

Acceptance of foreign college students contributes to maintenance and enhancement of international competitiveness such as in science and technology, industry and other areas, and to global intellectual contribution by cultivating human resources. Also, it is meaningful in many ways such as deepening of mutual understanding and friendship by creation of a human network, thereby contributing to the stability and peace of the world. Further, as the acceptance of foreign college students generates an international environment on campus and contributes to Japanese people having a global way of thinking through multicultural experience, it should be actively promoted.

For the purpose of increased acceptance of foreign college students, entrance examinations, enrollment control, livelihood and job-finding support by professional organizations in educational institutions is important. It is also necessary for the immigration control administration to implement ready acceptance, however, at the same time, due consideration needs to be paid so as not to increase overstayers or illegal workers.

To this end, educational institutions should maintain the quality of foreign college students by proper entrance examinations and responsible enrollment control of excellent foreign college students having an enthusiasm for learning and provide the Immigration Bureau with information concerning the residence situation of foreign college students, while the Immigration Bureau should undertake proper residence management of foreign college students, based on information provided by the educational institutions and fact-finding research.

Studies should also be carried out on measures to enhance incentives for educational institutions toward proper entrance examination and enrollment control by evaluating examinations for foreign college students and enrollment control, as well as by grasping the number of enrolled persons within the framework for evaluation of colleges.

2. Concerning Entry and Residence Examination of Foreign College Students

As the 300,000 Foreign College Students Plan advances, prompt and smooth entry and residence examinations need to be implemented to cope with the large volume of entry applications that is expected in the days ahead.

For this purpose, with respect to applications made by educational institutions that do not give rise to overstayers or illegal workers by proper entrance examination and enrollment control, documents to be submitted should be drastically simplified and the examination period should

be drastically shortened so that a decision can be given within one week, in principle, after the application.

On the other hand, with respect to applications made by educational institutions that give rise to large numbers of overstayers or illegal workers as a result of failure to implement proper entrance examination and enrollment control or those making fraudulent applications or providing false information, strict examination needs to be carried out as in the past.

3. Concerning Activities Other Than Those Permitted by the Status of Residence of College Student

The provision of various scholarships or sufficient money sent from the home country is desirable so that foreign college students can safely devote themselves to their learning, however, many foreign college students actually compensate college and living expenses by part-time jobs due to reasons of economic disparity with their home country, etc.

Taking the foregoing actual situation into account, the current treatment of permission for activities other than those permitted by the status of residence of college student should be maintained and, in addition, consideration should be given so that activity as a TA (teaching assistant), RA (research assistant) or internship, which can go together with study in college, do not require permission for activities other than those permitted by the status of residence of college student, on condition that such activities are performed under the responsibility of the college.

Further, educational institutions need to perform entrance examination for selecting foreign college students having a high enthusiasm for learning so that their study life abroad will not be dedicated to employment, and proper enrollment control so that their activities will not lead to illegal activities other than those permitted by the status of residence of college student.

4. Concerning Job-finding Support for Foreign College Students after Graduation

The acceptance of foreign college students contributes to cultivating the human resources of students' countries, development of Japan's economic society, the progress of science, technology and learning, and creating human resources capable of enthusiastically working on the global stage. At the same time, allowing foreign college students to work actively and continuously in Japanese companies by making good use of their knowledge and the skill acquired at the college will not only contribute to Japan's development, but also induce foreign students to study in Japan.

For employment of foreign college students after graduation, human resource education at educational institutions, job-finding support as closely supervised as that for Japanese students and job-finding support at "employment service centers for foreigners" (Hello-Work for foreigners) are important, and active employment and promotion in companies are indispensable.

Even in cases where foreign college students return to their home country after graduation, the possibility of offering continued support for them should be studied.

From these viewpoints, the Immigration Bureau should respond broadly and flexibly to job-finding support for foreign college students by not requiring any specific relationship between their major college subjects and the details of their work at employing companies, in respect of change of status of residence to work status for graduates from faculties and graduate schools. By reviewing the documents to be submitted, the burden on companies employing foreign college students should be alleviated and examinations should be carried out promptly. Further, the job-finding activity period after graduation should be extended to about one year with continuous job-finding support by educational institutions after graduation as a prerequisite, since a certain achievement is recognized to have already been made by the current maximum period of stay of 180 days.

5. Concerning Period of Stay for Status of Residence of “College Student”

The period of stay for the status of residence of “College Student” is “two years” or “one year”, however, from the viewpoint of convenience of and less burden on foreign college students and educational institutions, it is appropriate to extend the period of stay for the status of residence of “College Student”.

However, the period of stay should be extended without ignoring potential problems such as increasing overstay, and after creating a system where problems will not arise, by thorough enrollment control by educational institutions under the new system of residence management.

At that time, if a foreign college student is no longer enrolled due to reasons of graduation or leaving the institution, the educational institution must inform the Immigration Bureau promptly, and the Immigration Bureau receiving the notice should cancel the status of residence of the foreign college student in question if necessary.

6. Concerning Integration of Status of Residence of “College Student” and “Pre-college Student”

Currently, activities by foreigners to receive education in Japan are classified into the status of residence of “College Student” or “Pre-college Student” based on the type of educational institutions. Their residence is controlled as to whether they receive education at advanced educational institutions such as colleges in which case they are referred to as “College Student”, and or whether they receive education at high schools, special schools (general course, advanced course) and miscellaneous schools, etc., in which case they are referred to as “Pre-college Student”.

However, many western countries do not classify the status of residence by the type of educational

institution, and it has been pointed out that Japan should also eliminate such classification.

Also, with respect to educational institutions teaching Japanese language, based on the facts that about 70% of persons who pass through such educational institutions go to colleges, etc. in Japan, and that colleges and companies tend to make much of the Japanese language capability of foreign college students, there is a stronger tendency to place a pre-college student as a step towards college student in connection with increased acceptance of foreign college students.

On the other hand, the number of overstayers having the status of residence of “Pre-college student” formerly greatly surpassed the number having the status of “College Student”, however, it is decreasing year by year and was smaller than the number of overstayers having the status of residence of “College Student” after the year 2006.

Taking the foregoing situation into account, the classification of status of residence for activities by foreigners to receive education in Japan should be eliminated, and “College Student” and “Pre-college Student” should be integrated. On the one hand, the status of residence should be integrated, however, requirements for landing permission as the “conditions provided for by a Ministry of Justice ordinance which shall be provided for in consideration of factors including but not limited to the effects on Japanese industry and public welfare”, should be in line with the type of educational institution for which proper residence control should be implemented.

On the other hand, educational institutions are required to carry out proper entrance examinations and enrollment control, and to provide the Immigration Bureau with information on the residence situation of foreign college students, while the Immigration Bureau should carry out proper residence management based on the information provided by educational institutions and accurate fact-finding research. If, with respect to an educational institution specified by the notification by the Minister of Justice, facts that make the educational institution inappropriate as the accepting educational institution from the viewpoint of ensuring proper residence management come to light, strict measures, such as deletion from said notification, are necessary.

Section 1 ◆ Summary

Most administrative litigation, etc. relating to the Immigration Bureau (hereinafter referred to as “Immigration Control Relative Litigation”) are litigations demanding nullification of a deportation order issued to foreigners illegally residing in Japan, or those demanding reversal of non-recognition as a refugee. The number of cases of litigation brought and newly accepted has been increasing rapidly in recent years, and the number of accepted cases in 2008 was 336, which stood at a record high. In particular, the number of acceptances relating to deportation procedures was 234, which represented a 48% increase as compared with the previous year. (Table 51) Also, the number of completed litigations by year was, in cases of merit, 190 cases in 2006, 257 cases in 2007, and 355 cases in 2008, thus it is increasing year by year.

As a background to this increase, the reform of the judicial system can be cited, which aims to ensure prompt proceedings by proper and sufficient procedures. In particular, the “Act for Partial Amendment of the Administrative Litigation Act” was put into force on April 1, 2005. This aimed to define a more effective remedial procedure for the rights and interests of people in connection with administrative litigations, the amendment of which involved the establishment of a system of provision (suggestion) of information on the statute of limitations, etc., extension of the statute of limitations, simplified and easy-to-understand eligibility for defendants in nullification litigation, etc. and so on. Such amendments can be regarded as the background to the increase in the number of newly accepted cases. Also, efforts are being made to further accelerate court proceedings as a whole due to the “Act for Prompt Proceedings” which was promulgated and came into force in July 2003, and which can be regarded as the background to the increase in the number of completed cases.

Further, the Immigration Control Relative Litigation of recent years observes new types of filing for litigation, such as obligating special permission for residence, obligating provisional permission for residence, issuance of detention orders, and their injunction and provisional injunction. The circumstances in which obligating litigation and injunction litigation were made statutory and a provisional remedy system prior to judgment on merit was defined by the “Act for Partial Amendment of the Administrative Litigation Act”, where litigation systems of these types were actively utilized, can be regarded as the background.

Table 51 Trend in number of filed cases of Immigration Control relative litigation (cases of merit)(as of the end of 2008)

Section 2 ◆ Major Court Cases

Court case 1

With respect to issuance of the certificate of eligibility, a person who applies for issuing the same is required to prove requirement of issuance. Therefore, if the application for the certificate of eligibility is insufficient and requirement of issuance are not proven, the Minister of Justice or the Director of the regional Immigration Bureau delegated by him/her is not obligated to hear circumstances from an applicant or his/her agent, or to ask them to submit additional material.

【Hiroshima High Court Judgment on April 25, 2008】

Court case 2

The ministerial ordinance for landing criteria requires foreigners intending to receive training, etc. at organizations in Japan to receive prompt landing examination after preparing material to prove their own conformity with the criteria, which aims to provide convenience for foreigners by publicly announcing the criteria for landing permission.

Therefore, provisions of the foregoing ministerial ordinance do not confer statutory status or legal position on the accepting organizations in question, enabling them to continue accepting or mediating trainees, etc.

It may be true that commitment by accepting organizations of misconduct pertaining to training for aliens in the past three years, in turn, has resulted in non-conformity with items (viii) and (ix) in the right-hand column, "Training", in the Appended Table I (4) of the Immigration Control Act under

the ministerial ordinance for landing criteria, and the application for landing relating to the trainees, etc., would not now be approved. The Director of the Osaka Regional Immigration Bureau, which the appellant regards as the competent administrative agency, considered the foregoing circumstances and gave notice of recognizing misconduct to the appellant. However, it cannot be interpreted that such notice falls under an administrative disposition that gives rise to legal effect on the appellant. The recognition of misconduct should be interpreted as advance recognition by the Director of the Osaka Regional Immigration Bureau of facts falling under requirements prescribed in the foregoing ministerial ordinance for landing examination of foreigners, and as a warning to the appellant who would suffer a disadvantage thereby. However, such recognition cannot be regarded as a binding legal constraint, even if the appellant cannot accept trainees for three years and would suffer a disadvantage.

【Osaka High Court Judgment on June 26, 2008】

Court case 3

Article 48, paragraph (5) and Article 10, paragraph (4) of the Immigration Control Act provide that a suspect may cause one of his/her family members or acquaintances to attend oral proceedings by obtaining the permission of the Special Inquiry Officer. The plaintiff asserts that, although the plaintiff could speak daily conversational Japanese, he could not well understand the meanings of idioms or technical terms and differences of nuance of expression, that, therefore, oral proceedings by the Special Inquiry Officer of Nagoya Regional Immigration Bureau that were implemented prior to the decision, and the disposition of issuing the written order, for this case should have caused X, who was well acquainted with the plaintiff himself and his Japanese wife X, to attend, however, such proceedings were implemented without such attendance, and that such proceedings have procedural illegality in such point.

However, Article 48, paragraph (5) and Article 10, paragraph (4) of the Act do not provide that proceedings in oral procedure must be implemented with an attendant without fail, but subject such proceedings to the permission of the Special Inquiry Officer. As it can be interpreted that the Special Inquiry Officer may not give permission if he/she considers that the presence of an attendant gives rise to any obstacle in the oral proceedings, a fact that the oral proceedings relating to the plaintiff were implemented without the attendance of X does not immediately constitute violation of the Immigration Control Act.

Further, as the plaintiff did not specifically argue in the oral proceedings that he fell under Article 24, item (iv) (b) and (i) of the Act, and as the assertion that there existed special circumstances to permit residence to the plaintiff specifically was fully stated in the record of statement by the plaintiff dated May XX, 2006 prepared by an immigration security officer of Nagoya Regional Immigration Bureau, (* snip *), it cannot be said that the non-attendance of X at the oral proceedings relating to the plaintiff constitutes a cause of illegality in the procedure for the decision, and the disposition of issuing the written order, for this case.

【Nagoya District Court Judgment on January 31, 2008】

Court case 4

Taking also the fact that the appellant continued to postpone a formal marriage with a Japanese woman X without any reasonable reason into account, it must be said that the appellant overstayed in Japan for employment purposes exceeding his period of stay and continued to overstay, even during the period of living together with X, for the purpose of working in Japan to send money to his home country, without giving priority to the creation of a stable marriage life with X by eliminating the state of overstay in Japan.

Hence, even though facts that the period of their living together itself was relatively long and that it was recognized that the appellant associated with parents and a sister of X like family are taken into account, the appellant and X at the time of decision of this case were in a relationship where the appellant continued to overstay to send money to his home country continuously and X economically depended on the income of the appellant for the repayment of debts arising from lavish expenditure, and it cannot be said that their relationship had substance as a marriage, the essence of which was to live together with an honest will for the purpose of ever-lasting spiritual and bodily connection.

【Tokyo High Court Judgment on March 19, 2008】

Court case 5

In nullification litigation in connection with a disposition of non-recognition as a refugee, the reason for which is that a person does not fall under the category of refugee, it is reasonable to interpret that the applicant is responsible for demonstrating that he/she falls under the category of refugee.

However, it cannot be denied that, in certain cases, evidence simply demonstrating eligibility as a refugee is scarce. Even if that is the case, at least, persons themselves who are recognized as a refugee are fully aware of facts relating to their eligibility as a refugee and capable of submitting evidence by stating such facts, and it is rather difficult to imagine a case in which it is totally impossible to submit evidence supporting the truth in their statement with respect to their eligibility as refugees. In that sense, it may be said that the issue of demonstration relating to eligibility as a refugee requires multilateral study by reason of the nature of cases in connection with the judgment on existence of evidence or difficulty of demonstration, and on the credibility of statements by persons concerned. However, the issue is not governed by principles that are different from ordinary civil litigations. Therefore, it cannot be said that the burden of demonstration by the foregoing applicant for refugee status should be alleviated only in respect of his eligibility as a refugee.

【Osaka High Court Judgment on June 12, 2008】

Data Section 5 Organizational Expansion and Staff Enhancement

Owing to significant changes in the circumstances affecting immigration control in recent years, in response to an increase in the quantity and in the complexity of immigration duties, measures have been taken to improve and expand the organization and staff for immigration control.

At the end of FY 2008, immigration control administration work was carried out by about 3,400 officials at the Immigration Bureau of the Ministry of Justice and other immigration control offices. Due to a wide range of problems in immigration control, further improvement and expansion of the organization and staff are still necessary.

Section 1 ♦ Organizations

1 Outline of the Immigration Control Organization

The organization that is responsible for immigration control duties is the Immigration Bureau, which is designated as an internal bureau of the Ministry of Justice. There are eight regional blocks, each of which has a regional immigration bureau as a local branch office of the Ministry of Justice. Each regional immigration bureau manages the district immigration offices and branch offices (including branch offices within the district immigration offices) under its jurisdiction. The Ministry of Justice also maintains three immigration centers as detention facilities. The organization as a whole performs various duties associated with immigration control such as immigration examinations, residence examinations, deportation procedures, and refugee recognition procedures in accordance with relevant laws and ordinances.

The Immigration Bureau, regional immigration bureaus, district immigration offices, branch offices, and immigration centers are collectively referred to as the “immigration control offices”. (Charts 22 and 23)

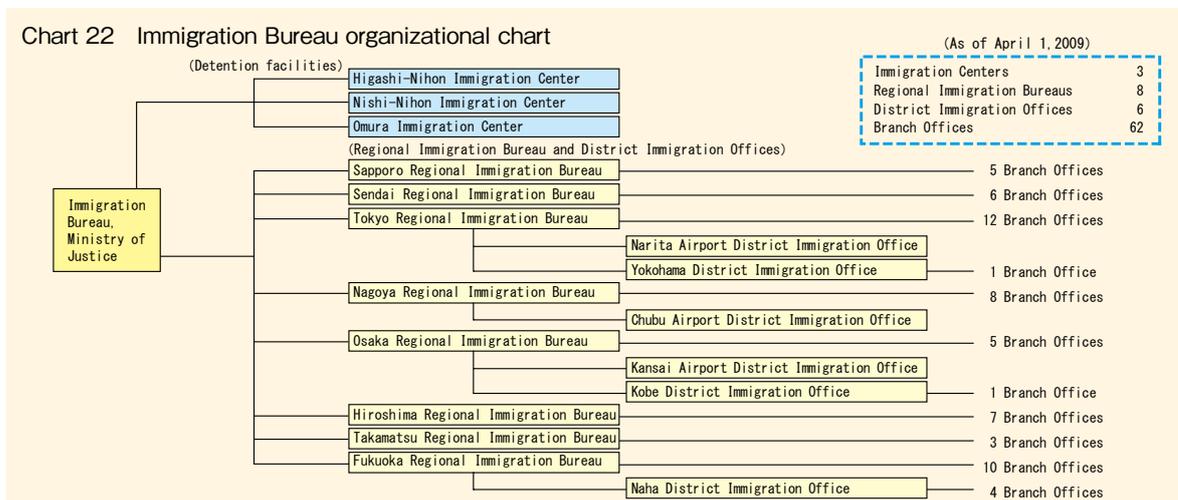

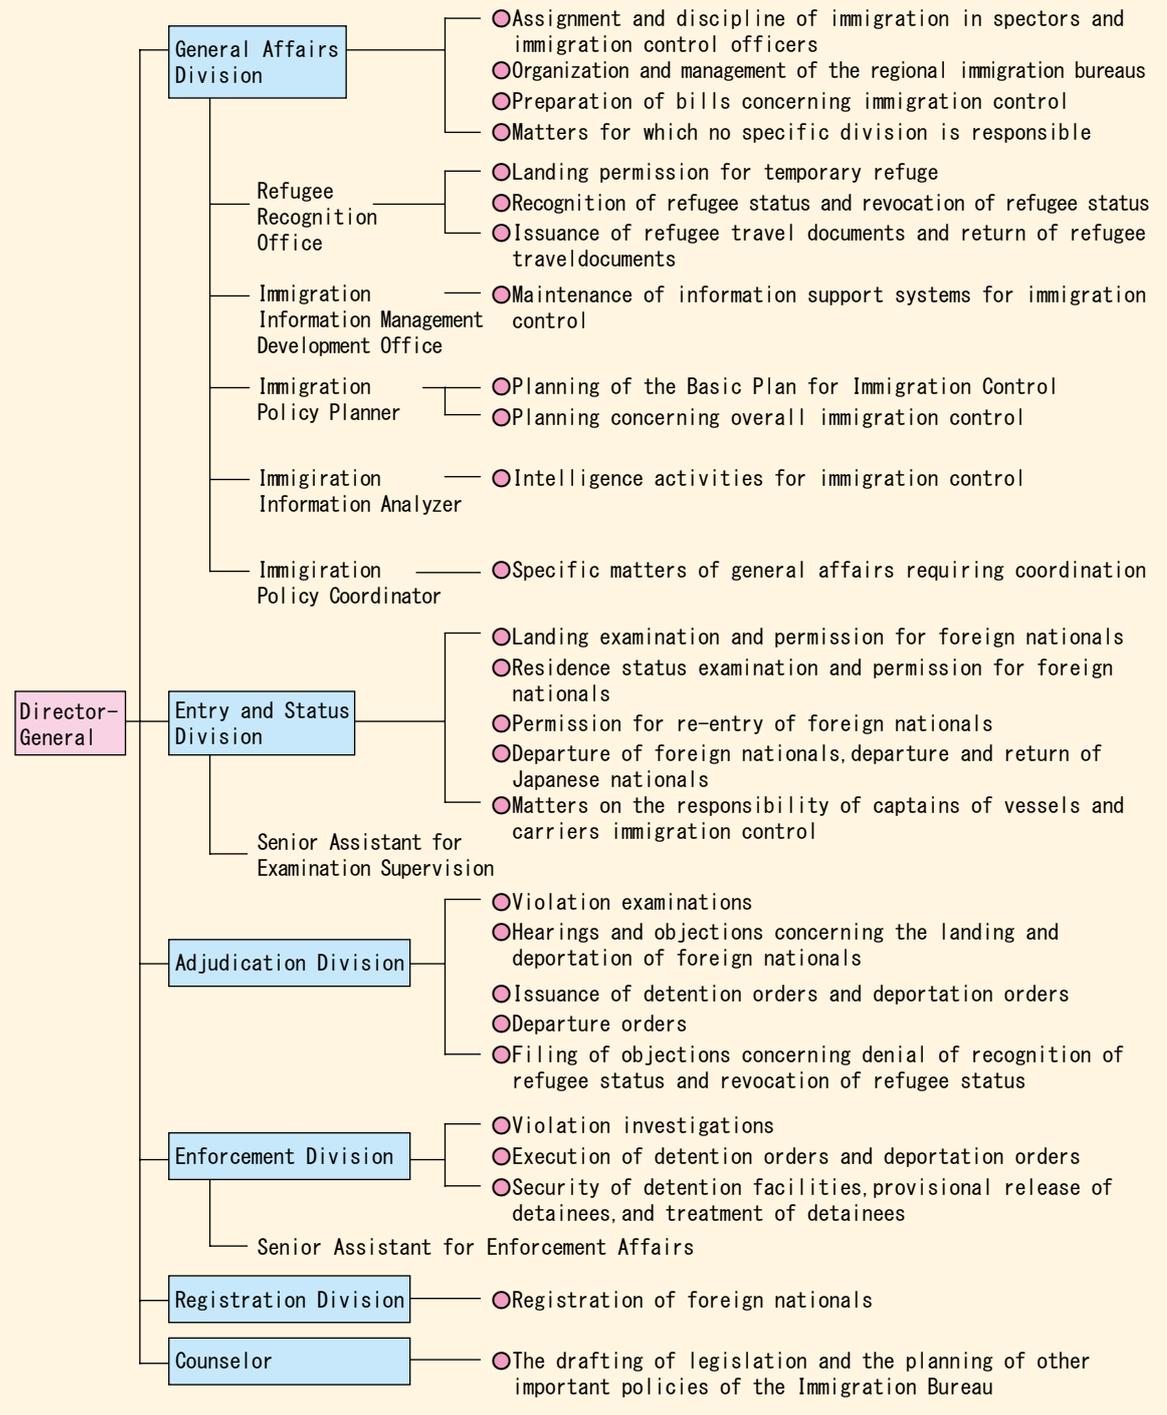

Chart 23 Responsibilities of the Immigration Bureau, Ministry of Justice

2 Major Expansions of the Immigration Control Offices

With respect to the expansion and enhancement of organization in FY 2009, the Yokohama District Immigration Office of the Tokyo Regional Immigration Bureau added one chief immigration security officer to cope with the increase of deportation services as the result of expansion of accommodation capacity in connection with relocation to a new office, and abolished the security department to establish the planning, management and research department, and the detention

and deportation department. Also, it has strengthened the detection and detention system by adding one senior immigration security officer for detection and detention respectively, and organized the system to ensure proper and prompt processing of violations by adding one senior examiner in charge of oral proceedings in the examination department.

Nagoya Regional Immigration Bureau also established an accounting section, and assigned a director and an assistant director to cope with the sharp increase of accounting work that was formerly handled by the general affairs section, and built up a system that can exclusively engage in the direction and supervision of accounting work including the normalization of contractual methods.

Further, most branch offices (including branch offices of district immigration offices) of regional immigration bureaus were located within the area of seaports, based on the historical background that they were originally established for immigration examination of crew members and passengers on ocean-going vessels. Now, as the primary means of international transportation shifted from vessels to aircraft, immigration examination at airports became the main service, and as foreigners residing in Japan for a long time increased, the Ministry has proceeded to reorganize, integrate or scrap branch offices at seaports to respond to the foregoing change in administrative needs, and made efforts to re-allocate branch offices by establishing them at local airports where many international flights arrive, places where prefectural offices are located, and other major cities. (Table 52)

Table 52 Reorganization, integration or scrapping of branch offices of regional immigration bureaus
(As of April 1, 2009)

Division Fiscal Year	Scrapping		Integration	
	Name	Location	Name	Location
2000	Amagasaki Port Branch Office Kure Port Branch Office Karatsu Port Branch Office Imari Port Branch Office	Amagasaki City Kure City Karatsu City Imari City	Saga Branch Office	Saga City
2001	Yokosuka Port Branch Office Kagoshima Airport Branch Office Shimizu Port Branch Office Tagonoura Port Branch Office	Yokosuka City Mizobe-cho Aira-gun Shimizu City Fuji City	Shizuoka Branch Office	Shizuoka City
2002	Iwakuni Port Branch Office Yatsushiro Port Branch Office Hitachi Port Branch Office Kashima Port Branch Office	Iwakuni City Yatsushiro City Hitachi City Kamisu-cho Kashima-gun	Kofu Branch Office Gifu Branch Office Otsu Branch Office Mito Branch Office	Kofu City Gifu City Otsu City Mito City
2003	Tokyo Port Branch Office Shibuya Branch Office Muroan Port Branch Office Miyako Port Branch Office Ofunato Port Branch Office Ishinomaki Port Branch Office Sasebo Port Branch Office Naha Port Branch Office	Koto-ku Tokyo Shibuya-ku Tokyo Muroan City Miyako City Ofunato City Ishinomaki City Sasebo City Naha City	Shinjyuku Branch Office Morioka Branch Office	Shinjyuku-ku Tokyo Morioka City
2004	Aomori Port Branch Office Hachinohe Port Branch Office Yokohama Port Branch Office Nagoya Port Branch Office Nagoya Airport Branch Office Sakai Port Branch Office Kobe Port Branch Office Mizushima Port Branch Office Shibushi Branch Office	Aomori City Hachinohe City Yokohama City Nagoya City Toyoyama-cho Nishikasugai-gun Aichi Sakai City Kobe City Kurashiki City Shibushi-cho Soo-gun Kagoshima	Aomori Branch Office	Aomori City
2005	Naoetsu Port Branch Office	Joetsu City		
2007	Osaka Port Branch Office Tennoji Branch Office	Osaka City Osaka City	Tobu Branch Office	Edogawa-ku Tokyo

The foregoing is in line with the basic policy, “Branch offices of regional immigration bureaus should be reorganized from sea-type to inland-type, and reduced” , as shown in the “Basic Plan for Downsizing and Streamlining of National Administrative Organizations” decided by the Cabinet in April 1999. It is necessary to continue rationalizing and streamlining organizations by maintaining branch offices of the “General Immigration Control Office” type that comprehensively perform immigration examination, residence examination and collection of information relating to persons violating the Immigration Control Act.

Section 2 ◆ Staff

1 Immigration Control Staff

In immigration centers and regional immigration bureaus, immigration inspectors and immigration control officers are assigned as staff who are engaged in immigration control duties. In addition, officers of legal affairs engage in general administrative duties and specialists of legal affairs, including doctors, are also assigned.

Immigration inspectors are responsible for (i) examinations and hearings on landing and deportation, (ii) issuance of written detention orders and written deportation orders, (iii) provisional release, and (iv) investigation of recognition of refugees and statuses of residence. They are also engaged in examining statuses of residence as assistants for the Minister of Justice.

Immigration control officers are responsible for (i) investigation of violations concerning entry, landing or residence in Japan, (ii) detention, transportation and deportation of foreign nationals in order to execute written detention orders or written deportation orders, and (iii) treatment of inmates in immigration centers and detention facilities and guards of these detention facilities. They fall under police personnel in relation to the National Civil Service Law and the Law Concerning Salaries for General Service Personnel. As they are often involved in dangerous tasks, they are regarded as public security service staff.

Immigration control officers are divided into seven ranks (keibikan, keibicho, keibishicho, keibishi, keibishiho, keishucho, and keishu, in order of descending superiority) in order to clarify the chain of command for group operations for detection.

Individual immigration inspectors and immigration control officers perform their duties independently as specialists in immigration control and therefore, the specialist system was introduced. These officials are required to have legal knowledge necessary for their duties as well as a balanced point of view

Immigration control staff

from an international perspective and the ability to interact with foreign nationals flexibly while giving consideration to their diverse cultures, customs and religions and their human rights.

2 Staff Increase

The number of immigration control staff was 3,565 in FY 2009, up about 26% (732) from FY 2004 (2,833), five years ago. During this period, the number of cases handled by immigration control offices remained at a high level, and the immigration control duties have been getting more complicated and difficult due to the necessity of implementing stricter immigration examinations to prevent terrorism and illegal entry, coping with forged or altered documents that have become increasingly more sophisticated, strengthening residence management related to foreign residents after entry and enforcing strengthened detection of illegal foreign residents, some of whom are potential criminals. (Chart 24, Table 53)

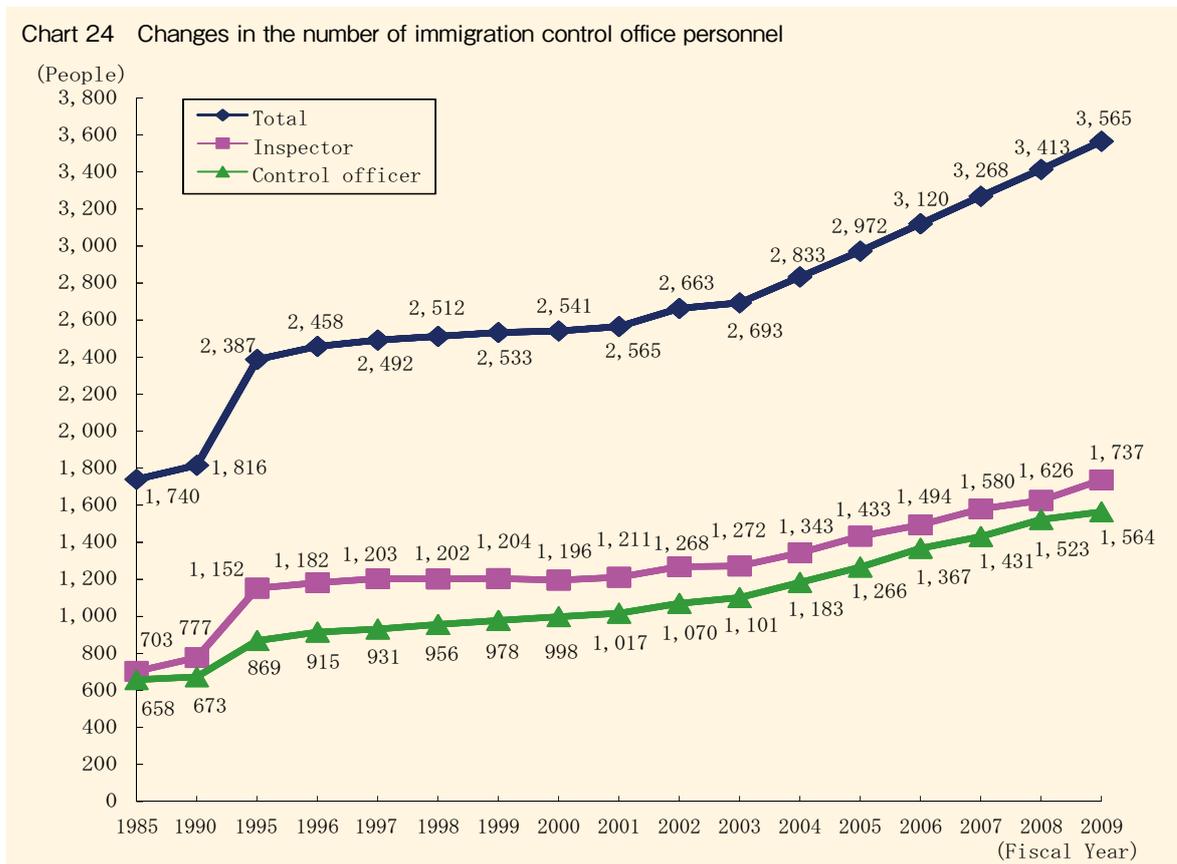

Table 53 Changes in the number of immigration control office personnel (People)

Fiscal Year	Division Secretaries in the Ministry of Justice	Regional Immigration Bureaus					Total
		Secretaries	Inspector	Control officer	Others	Sub-Total	
1985	169	155	703	658	55	1,571	1,740
1990	166	154	777	673	46	1,650	1,816
1995	163	165	1,152	869	38	2,224	2,387
1996	161	166	1,182	915	34	2,297	2,458
1997	161	166	1,203	931	31	2,331	2,492
1998	159	166	1,202	956	29	2,353	2,512
1999	159	165	1,204	978	27	2,374	2,533
2000	157	164	1,196	998	26	2,384	2,541
2001	156	155	1,211	1,017	26	2,409	2,565
2002	154	146	1,268	1,070	25	2,509	2,663
2003	152	144	1,272	1,101	24	2,541	2,693
2004	142	142	1,343	1,183	23	2,691	2,833
2005	131	122	1,433	1,266	20	2,841	2,972
2006	129	122	1,494	1,367	8	2,991	3,120
2007	128	121	1,580	1,431	8	3,140	3,268
2008	127	129	1,626	1,523	8	3,286	3,413
2009	126	130	1,737	1,564	8	3,439	3,565

In FY 2009, 199 persons were additionally assigned as immigration inspectors and immigration control officers. An outline of the staff increase is as follows

(1) Strengthened Immigration Control of the Regional Immigration Bureau such as the Narita Airport District Immigration Office

The “Basic Act for Promoting a Tourism-Oriented Country” was put into force in January 2007, and the “Basic Plan for Promoting a Tourism-Oriented Country” was decided in June of said year by the Cabinet aiming to “increase the number of foreign tourists visiting Japan to 10 million by 2010”. As it is expected that further active campaigns to invite foreign tourists will be developed in the future, it is necessary to make efforts to shorten the waiting time for examination by flexible allocation of staff or other measures and, at the same time, to implement strict immigration examination as countermeasures against terrorism and illegal residents.

For this purpose, in FY 2009, an additional 28 and 10 immigration inspectors were allocated to Narita Airport District Immigration Office and Chubu Airport District Immigration Office respectively, where connection facilities from domestic lines to international lines were improved, and an 28 additional immigration inspectors were allocated to regional immigration bureaus, etc., governing regional seaports and airports. Further, in order to deal quickly with immigration examination for large cruise ships, etc., that were increasing specifically in the Kyushu and Okinawa areas, an additional 9 immigration inspectors were allocated to the Fukuoka Regional Immigration Bureau.

In July 2008, the gist of the “300,000 Foreign College Students Plan” was decided by concerned ministries and agencies. Since it is expected that foreign college students accepted from foreign countries will increase in the future, an additional 12 immigration inspectors were allocated to Tokyo Regional Immigration Bureau as pre-entry examination staff for these foreign college students.

(2) Strengthened Residence Management System of the Regional Immigration Bureau such as the Tokyo Regional Immigration Bureau

As the number of foreigners residing in Japan increases year by year, adverse effects due to deceptive stayers, who adopt the external appearance of normal residents by deceptive marriages, but who actually engage in simple labor exclusively or commit crimes by enrolling in or cooperating with criminal organizations, have become a serious problem.

In recent years, as a result of the increase in the number of resident foreigners, the number of cases of application for permission of permanent residence is expected to increase. As staff for implementing proper examination without overlooking applications, among very many applications, by deceptive stayers who adopt the external appearance of normal residents by deceptive marriages, etc., an additional 25 immigration inspectors were allocated to the Tokyo Regional Immigration Bureau.

(3) Strengthened of Detection System at Yokohama District Immigration Office

Yokohama District Immigration Office, which intends to move to a new office in FY 2009, is responsible for the Keihin Industrial Area, and bustling shopping and entertainment districts such as Yokohama City and Kawasaki City, and governs Kanagawa Prefecture which is highly attractive for illegal workers. However, the District Immigration Office could not necessarily implement deportation procedures sufficiently, including detection and taking suspects in from concerned agencies such as the police, since its facilities were small. Movement to the new office will release the District Immigration Office from physical restrictions, and make it possible for the District Immigration Office to implement wider detection activities, etc.

Concurrently, additional personnel were allocated as follows: 28 immigration control officers for research and detection of violations at said District Immigration Office, 5 immigration inspectors as examiners for proper and prompt processing of violations, and 32 immigration control officers as detention and supervisory staff for the expanded detention facility and staff for realizing its efficient operation, which aimed to enhance and strengthen the detection system at the said District Immigration Office.

Further, cases of illegal embarkation and disembarkation using ships occurred in recent years

mainly in the western part of Japan, and problems of crimes, etc. committed by illegally entering persons became a serious matter. As stricter countermeasures against illegal embarkation and disembarkation using ships had become an urgent task for the purpose of not damaging the effectiveness of immigration procedures utilizing personally identifiable information, which was introduced in November 2007, an additional 12 immigration control officers were allocated to Fukuoka Regional Immigration Bureau.

(4) Strengthened Refugee Adjudication System of the Regional Immigration Bureau such as the Tokyo Regional Immigration Bureau

The introduction of the refugee examination counselors system in 2005 enhanced the equity and neutrality of the refugee recognition procedures, but the number of applications for refugee status suddenly increased from 384 in 2005 to 954 in 2006, and reached 1,599 cases in 2008. In 2009, 9 additional refugee examiners were assigned to the Tokyo Regional Immigration Bureau, and 1 additional refugee examiner to the Nagoya Regional Immigration Bureau, to ensure quick and proper examination of these suddenly increasing applications for recognition as a refugee.

3 Training

As the number of foreign nationals entering and departing from Japan has been increasing year by year and the types of residence have diversified, the volume of services has increased and the contents have become more complicated and difficult. It is therefore indispensable to enhance the skills and abilities of the officers of the Immigration Bureau, and so we are in the process of enriching and reinforcing our training program.

Training

In addition to systematic training for newly employed persons, middle-level persons and managers implemented by the Research and Training Institute of the Ministry of Justice, which is a training organization of the Ministry of Justice, the Immigration Bureau implements various kinds of practical training for the purpose of enhancing the professional knowledge of staff: training for persons engaged in the detection of document forgery, training for persons engaged in entry and residence examination work, training for persons engaged in refugee recognition work, training for immigration security officers and persons engaged in security and detention, training for persons engaged in information system operation, etc., and so on. In addition to the foregoing, the Immigration Bureau makes efforts to give staff a wide range of knowledge and experience by having them participate actively in seminars that are held by inviting outside lecturers: seminars

relating to human rights, seminars relating to mental health, seminars conducted by related organizations such as the police, overseas seminars, and so on.

Also, as the work of the Immigration Bureau is mainly concerned with foreigners, it makes efforts to improve language skills necessary for the work by organizing language seminars in English, Chinese, Korean and other languages for staff at professional language schools, etc.

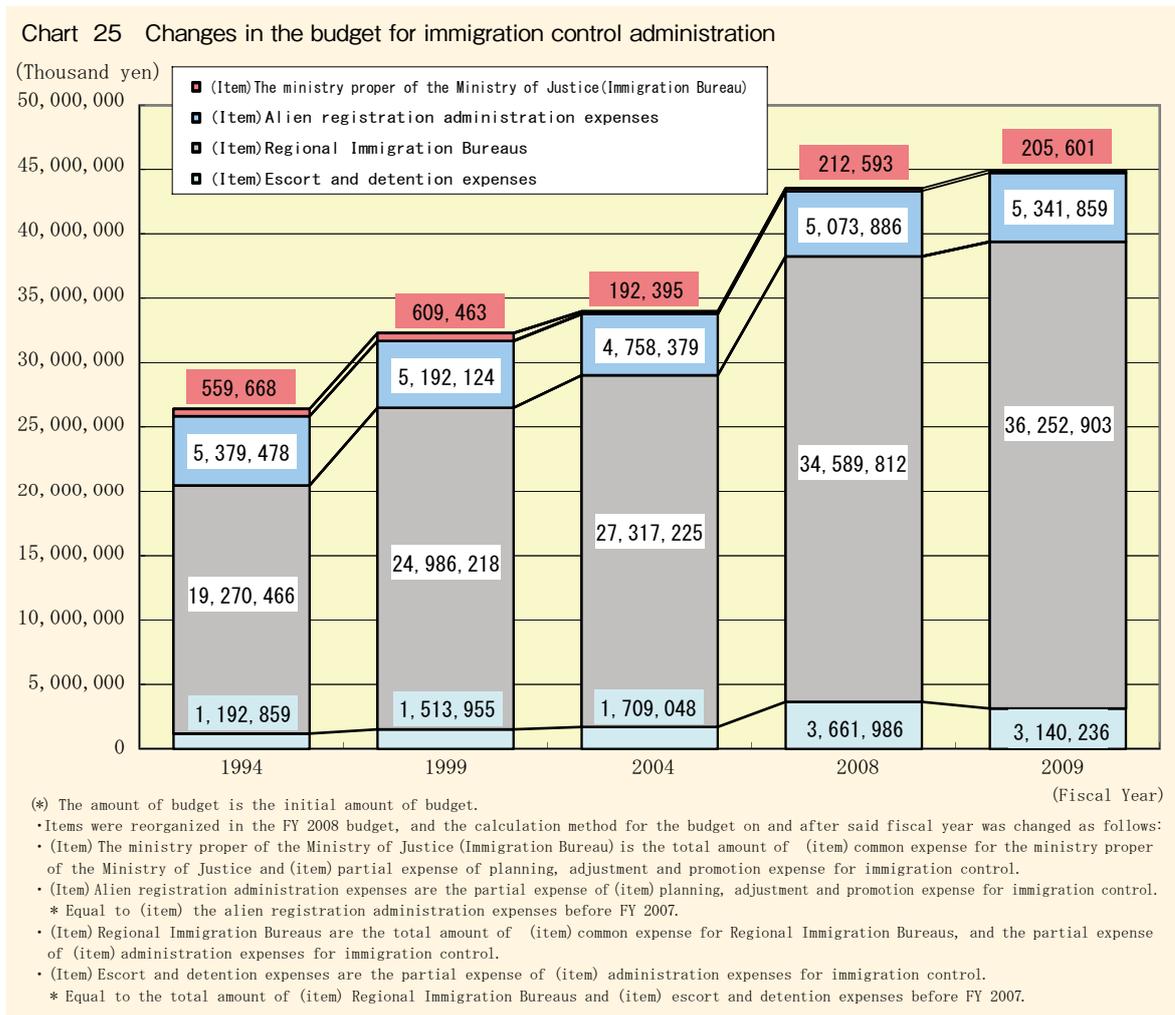

Data Section 6 Budget

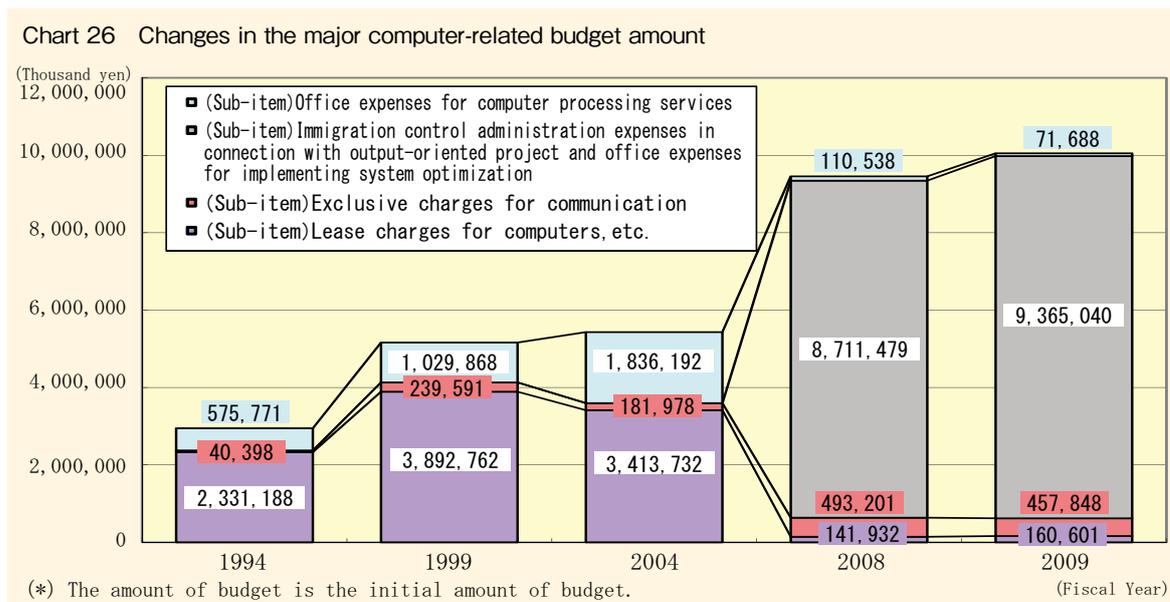

Section 1 ♦ Budgets

Chart 25 shows the trends in budgets for immigration control administration. Despite severe fiscal and administrative limitations in recent years, the fiscal authorities approved the Immigration Bureau's expenses to implement necessary immigration control duties and related projects leading to improvement and enhancement of immigration control administrative capabilities.

With respect to the budget related to computer operation, efforts have been made to reduce the budget year by year, with the budget for FY 2003 being the highest, as a result of continued cost-cutting by rationalization of various systems.

However, as the cost of constructing an immigration examination system utilizing biometrics was approved in the budget of FY 2009 running on from the budget of FY 2008, the budget was drastically increased. (Charts 25 and 26)

Section 2 ◆ Facilities

As of March 31, 2009, 8 regional immigration bureaus in the nation are housed in an independent office of the Ministry of Justice (Tokyo, Nagoya, Osaka), a joint office of the Ministry of Justice (Sendai, Takamatsu), an administrative joint office (Sapporo, Hiroshima), and a private facility (Fukuoka) respectively. District immigration offices and branch offices of regional immigration bureaus are housed in a joint port office, an administrative joint office, an airport terminal building, and private and public facilities.

All 3 detention centers for immigrants in the nation are modern facilities that were completed after the year 1993, which are maintained as independent office of the Ministry of Justice (Omura) and the general office of the Ministry of Justice (East Japan, West Japan).

Due to globalization, more and more foreign nationals are entering and staying in Japan of late. In addition, Japan also has many illegal foreign residents. To address such situations, the regional immigration bureaus have recently been constructing new buildings and have expanded a detention facility in order to increase the capacity.

As part of the project, a new building of the Yokohama District Immigration Office of the Tokyo Regional Immigration Bureau will be completed in 2009.

The Immigration Bureau will continue to upgrade its immigration control facilities as needed for the purpose of ensuring proper operation of immigration control administration. (Table 54)

Table 54 Changes in the capacity for detention

Fiscal Year		(People)				
Division		2005	2006	2007	2008	2009
Total		3,410	3,410	3,848	3,848	3,998
Immigration Centers		1,800	1,800	1,800	1,800	1,800
Regional Immigration Bureaus		1,610	1,610	2,048	2,048	2,198
